PROFILE

Passionate about building fast, clean, and accessible web applications. Skilled in front-end development with React and Tailwind, and experienced in crafting robust back-end systems. With a strong foundation in Computer Science, I'm committed to continuous learning, exploring new technologies, and optimizing both performance and developer tooling. Actively contribute to open-source projects and stay up-to-date with the latest tech trends.

EDUCATION

2022-2026	B-Tech in Computer Science & Engineering Avanathi's ST Theresa Institute of Engineering & Technology	7.51 cgpa
2020-2022	Intermediate MPC Sri chaitanya Junior College(Steel plant,visakhapatnam)	67%
2019-2020	SSC Pragathi public english medium school	82%

SKILLS

Programming: c(basic),python(intermediate) | **Web Technologies:** HTML5, CSS3, java Script. | **Frameworks:** React, Tailwind CSS, Bootstrap. | **Deployment & VersionControl:** Vercel, Git, GitHub | **Databases:** SQL, MySql
SoftSkills: Problem-solving, Communication, adaptable.

PROJECTS

HRMS(Human Resource Management System), *A Human Resource Management System built with React and Tailwind CSS.* 🔗

This frontend application includes dashboards tailored for Admins, HR, and Employees, and offers features like:

- Attendance tracking and history
- Leave management and payroll simulation
- Editable profiles with avatar upload
- Role-based navigation and secure authentication
- Responsive design for smooth experience on desktop and mobile

Portfolio Website, *A personal portfolio to showcase projects and skills.* 🔗

This project showcases my ability to blend creativity with modern digital aesthetics. I designed a realistic 1/7 scale figurine based on a custom character, capturing fine details in outfit, hairstyle, and expression to reflect authenticity. The figurine sits casually atop a 3D Instagram logo icon, placed on a transparent acrylic base for a premium collectible look.

Feedback Form website, *A feedback form with validation features.* 🔗

Built a user-friendly feedback form collecting name, rating (1–5 stars), and comments. Designed with modern UI using Bootstrap and custom CSS styling. Implemented JavaScript validation to ensure required fields are filled. Ensured smooth user experience with form reset and success alert on submission.

To Do List website, *A productivity task management tool.* 🔗

This app allows easy task management with features like create, edit, check/uncheck completion, filter, and smooth deletion animations. The UI is styled with Tailwind CSS, offering a sleek, responsive, and user-friendly experience. It's a great example of using React state management and animations together to build a simple yet effective productivity tool.
